Recommended tools and material

Measuring tape

Pencil

Jigsaw

Plumber's putty

1. Thoroughly clean the surface of the counter to be drilled.
2. Trace the dimension of the hole to be drilled in the counter using the template for drop-in models, or simply using a measuring gallon for vessel sinks.
3. Cut out the opening using a jigsaw, use a soft cloth between the counter surface and the jigsaw to not damage or scratch the counter.
4. Ensure that there is enough clearance under the countertop for drain assembly and piping.
5. Apply sealant to the bottom lip of the washbasin. Place the washbasin in the desired location. Press firmly to spread the sealant, immediately wipe off any excess sealant with a damp cloth.
6. Let the putty dry for a few hours before connecting the water supply and drain pipes.
7. Install faucet and drain following the instructions provided. Be careful, not to overtighten the drain to the washbasin to avoid breaking or cracking it.
